## Personal Statement

With years of experience in Colorado's Front Range music scene, I have developed a deep appreciation for the artistry and hard work that go into creating exceptional performances. Through roles as a band leader/member, independent DJ, techno producer, and event booker, I've been fortunate to collaborate with talented individuals and perform in over 35 successful events. My focus has always been on building connections and creating memorable experiences, both on and off the stage. Driven by a love for music and community, I strive to support and grow alongside the vibrant local music scene.

## Education
